

# Concerns raised re Shurlock Road Open Space and Nature Reserve

By neighbour

He is worried by the leak that is coming from Downfield Tip (he thinks and is currently extending about 3/4 of the way along the road from Cool Bawn towards his land. He says it is contamination and has killed of the trees and hedges that it has gone past. He has a point - there is definitely something funny going on there. HE NEEDS TO RAISE THIS WITH THE ENVIRONMENTAL HEALTH DEPARTMENT , IT'S NOTHING TO DO WITH OUR PROJECT

He is worried by the big mound of earth that has been excavated. He wants to know will it be left like that, at that height. IT WILL BE LEFT BUT IT WILL SETTLE AND REDUCE IN HEIGHT OVER THE NEXT 12 MONTHS

He is very worried by the pond which has been dug out. He says it is like a lake about 50metres by 30metres and about 5 ft deep. He says this will be a drowning danger for any youngsters using the site. Can we reassure him by giving him the proposed finished dimensions of the pond? IT'S A SHALLOW POND WITH SLOPING BANKS , WE CAN REVIEW ONCE IT HAS BEEN LANDSCAPED AND AMBIKA HAS VISITED SITE , ITS PROBABLY NO DEEPER THAN THE DITCH ALONG THE ROAD VERGE

He continues to be concerned about the fencing next to his cowshed. Will we be putting up the fencing and hawthorn hedge along that area as had precviusly been intended (but further south) when he was going to swop the entrance for the rough area of land? HE CAN STILL TAKE OVER THIS SMALL PIECE OF LAND AND PLANT IT HOW HE WANTS , WE SAID WE WOULD SWAP THIS LAND FOR HE AND HIS WIFE GIVING UP THEIR RIGHTS OF ACCESS OVER THE ENTRANCE –HE HAS DECIDED NOT TO GO AHEAD WITH THIS .I WILL SPEAK TO AMBIKA .
